Skills

- I have been using Python for almost six years now, this has allowed me to develop a high level of understanding for the language.
- During the first lockdown I decided to pick up game design. By doing so I managed to learn the basics for different languages such as C# and Java.
- As a school assignment we were given the task to create a fully functional website, I challenged myself by hard coding the whole website instead of using software. This allowed me to learn the basics for HTML and JS
- As someone that spends a lot of time programming I have managed to gain a somewhat fast typing speed. I am able to type at around 120 WPM. However, I am able to type around 135 WPM if I am copying from a text.

Experience

Work Experience, Year 10
Smarten Up Dry Cleaners - *Assistant*

- Dealing with customers and their requests/queries
- Memorising the numerical order of thousand different garments
- Learning how to operate dry cleaning machinery to intermediate level.
- Displaying a high level of customer service.

Education

MONTH 2019- MONTH 2021
Winchmore School, N21 3HS - *A Levels*

Computer Science - Level 3 - Grade: Predicted Merit/Distinction

ICT - Level 3 - Grade: Predicted Distinction

Media - Level 3 - Grade: Predicted Distinction

Hobbies

- Interested in adapting my knowledge and understanding of computers to a much more advanced level.
- Programming different types of programs that benefit me in ways such as automation.
- Passion for deconstructing and rebuilding computer desktops.
- I enjoy learning about game development. During the first lockdown I started to use the Unity Engine to create simple games, I managed to learn a lot about how games work and how they are coded.
